Mines and Mining Stocks

PIOCHE MINES TO **RESUME QUICKLY**

Ready to Start Work Moment Supplies Arrive Over Rebuilt Railroad.

Virtually every mine in Pioche district which was at all active at the time the railroad service for the camp was shut off by the disastrous washout Sells Up to \$1.62, When Profiton the Salt Lake Route is ready to resume operations the moment the first new supplies are received over the reconstructed line, while several new properties will soon be added to the active list. As trains are due to be run over the Pioche branch by the end of the week, renewed activity for

extension of the Susan Duster vein.
The Mendha company has me marked improvement in its mine showing in the last few months, Mr. Rar says. It has at this time fully 20,0 tons of ore in sight-ore which no the company an average of \$15 a t under existing conditions, which is clude a haul of about twelve miles railroad. It has its bins filled as several cars are loaded with ore, react to be sent out.

At the dump of the old Raymond Ely mine, which contains several m Ely mine, which contains several millions of tons of ore and waste, men all employed sorting the ore, a large proportion of which carries values about \$50 a ton in lead, sliver and zin Mr. Rand believes that fully one-ha of the dump is ore of commercing and at this time. Operators of the early days, on account of the hig shipping and smelting charges, we unable to handle it.

Drift From Tunnel Cuts 0 Which Makes Beaver Mines Famous.

As a result of inaugurating explor As a result of inaugurating explor-tory work in a portion of its Beav county estate, in which surface worl-ings in the early days yielded consi-erable wealth, the Commonweal-Mines company has encountered a ve-of high-grade silver-lead ore of the sand earbonate variety—the kin which has made several neighborin mines famous. The streak of rich of ines famous. The streak of rich only four and five inches wide yet, but it is not unlikely that it we chen into a body of considerable size The strike was made in a driwhich is being sent out from the 8 foot point in the main tunnel, to gunder what is known as the old Kel under what is known as the old Kelly shaft. That shaft, sunk years ago by John Kelly, a pioneer operator of the camp, to the depth of only 60 feet, is said to have given up \$60,000 of high-grade ore. The shaft was bottomed in ore, it is said further, when Mr. Kelly, following the custom of the time, discontinued work until the shaft's becoming too deep for hoisting to be performed comfortably by hand.

The drift from the tunnel has something like 50 feet yet to be driven to intercept the main east and west vein, upon which the shaft was sunk. It is following a feeder of that vein, and the result thus early obtained affords promise of interesting disclosures in the real ore channel.

The Commonwealth company's estate is in the very heart of the Star district, which has lately been attracting much attention on account of performances of the Moscow, Red Warrior, Hub and other mines. The drift from the tunnel has some

The Hub and Lady Bryan mines, south and west of Commonwealth, and the Moscow and Red Warrior, north of Commonwealth, are all on the same

MAJESTIC CALLS FOR FIVE CENTS. An assessment of five cents a share, which becomes delinquent June 20, has been levied by the Majestic Mines company. The company's financial statement shows cash on hand July 31, 1908, \$25,466; rentals and interest receipts, \$26,509; ore shipments, \$5,020. Expenses for labor, machinery, etc., for the period covered were \$62,921, leaving a balance on June 1, 1910, of \$4,074.

performer on the mining stock mar-

the Ploche King, the Ploche X-Ray and a number of others are prepared to resume work at almost a moment's notice. The Mendha, Pioche Demijohn, Ploche Metals, Centennial Ploche and a few others have prosecuted work with reduced forces during all or a portion of the camp's quiet period, and their activities.

Strike in Mehawk.

The Pioche Mohawk, which is operating in the old portion of the camp, has only recently opened on the 200-foot level a nice vein of ore which gives values of \$125 a ton in silver, lead and gold. The California Pioche has a shaft down 200 feet, and, with machinery installed, is prepared to drift 100 feet, where it expects to open the extension of the Susan Duster vein.

The Mondhay was light. Bids several fissures. It is not improved the probable, Mr. Bohm says, that the probable, Mr. Bohm says, that the large ore bodies which are being opened in the Utah-Apex mine are the death of those issues. Iron Biossom was in some demand at 73 cents to 74 cents, Thitic Central brought \$\frac{9}{2}\$ to 24 cents and there was some trading in Lower Mammoth at 31\frac{1}{2}\$ cents to 30 cents. South Columbus was firm at 8 cents and New York Bonanza was offered at the close at 5 cents.

BINGHAM COPPER CUTS BED OF ORE

********* First Strike Is Made in Good Time—Company Elects Directors.

Ever since work was started in the Dav. Daly roperty of the Bingham Copper company under the new regime, outside: have been reporting at frequent in tervals that a strike had been made Taking Brings 10-Cent

Recession.

Nevada Hills was again the leading performer on the mining stock mar
Westerday, for the first time, was such that the confirmed by General Manage W. D. Bohm, when he said that the last several feet driven in the tunner when the present management tool charge the tunnel was in 900 feet headed in northwesterly direction.

When the present management tool charge the tunnel was in 900 feet headed in northwesterly direction. w. H. Kand, who arrived in this city yesterday from Pioche, said that upon every hand were preparations being made for resumption of work. The Consolidated Pioche company has generally weak market. The stock continues to be backed for a higher price by strong eastern interests and conditions at the mine appear to warrant a moderate advance. Under the Susan Duster shaft as well; the California Pioche has its machinery in readiness to be set in motion, while the Prince Consolidated, the Golden Prince, the Pioche King, the Pioche X-Ray and a number of others are prepared to resume work at almost a moment's notice. The Mendha, Pioche Demijohn, Pioche Metals, Centennial Pioche and a few others have prosecuted, work

Reorganization of Bingham Copper and the acquiring of adjoining properties needed to round out the estate wanted was accomplished by H. U. Hart of Boston, who has been engaged the last two or three years upon the project. Mr. Hart and Carl Brandt, another of the Boston large interests, arrived in the city yesterday from the east, after having stopped off at Cheyenne Monday to attend the annual meeting of the company. Cheyenne Monday to attend the annual meeting of the company.

The new directorate was named at that time and the meeting was adjourned to Boston for the completing of business, including the election of officers. The directors are Carl Brandt. H. U. Hart and George E. Davis, of Boston; Edward McGurrin of Salt Lake and A. L. Inglesby of Bingham. More than 400,000 shares of the company's total of 800,000 shares capitalization was represented at the Cheyenne meeting.

Important Strikes in Both Wihuja and Kindergarten Are Reported.

The sensational strike made a week ago in the Wihuja workings of the Seven Troughs Coalition Mining company has since that time been at least duplicated by the opening of a body of ore nearly twice as wide as the one encountered last week, says the Seven Troughs Miner. The values are not so high as were those obtained in the first ore shoot opened in the north and south vein encountered on the 500 level, but the two feet of ore carry values running well into the hundreds of dol-

On the third level a crosscut has been driven to the vein which parallels the one in which stoping is being done and another body of milling ore has

Nor is the Wihuja the only portion of the Coalition estate which is making a record. The east drift from the Wihuja shaft in the Kindergarten workings is now in ore which goes to the mill better than \$60 a ton as it is broken down. The extent of the shoot has not been determined, but on the level above it was proved to be more than 400 feet long.

The drift on the north and south vein is now all in ore. The values are low —just enough to mill, but the body is so large and the values have been so ensistently increasing that one of the best shocts in the property is expected

Milling Engineers' Ore. The Engineers' lease is still running its ore at the Coalition mill and the savings made are extraordinarily good, the ore being from the upper levels of the Kindergarten and strictly free mill Four more men have been adde to the working force and the next ru from the lease promises to be mucliarger. Without a single exception ev ery stringer of ore which has been followed in the Engineers' has opened up strong and today the lease ranks well with the other workings on the

The Tyler lease at a depth of 410 fee is breaking into the hanging wall of the Kindergarten vein. It is confidently expected that within the next week the work of drifting both ways on the vein will be well under way.

High Grade of Ore for Large Bodies and Cheap Work Are Features.

The property of the Gold Chief Minng company, near Panaca, Nevada, ac- P cording to W. H. Rand, of Portland, Ore., one of the large interests in the company, who arrived in the city yesterday from camp, is developing into one of the most remarkable mines in the country. Distinguishing features are the relatively high grade of the ore—for large bodies of cyaniding material—and the character of the formation, which makes the cost of mining extremely low

extremely low.

The prospect presented by these features is the mining and milling of a great tonnage of \$9 ore at a total cost not exceeding \$1.20 a ton.

"The Gold Chief shaft is down 500 feet," said Mr. Rand, "and the ledge, varying from eight feet to 40 feet in width, has been cut upon every level. varying from eight feet to 40 feet in width, has been cut upon every level. The underground workings measure 1,-600 feet and they are all in ore, the tonnage at this time in sight being close to 200,000 tons. The gold values range from \$6 to \$17 a ton, with the average certainly not less than \$9 a ton. The ore lends itself readily to treatment by the cyanide process.

"I have never seen elsewhere ground that was so easily worked. The company's shaft was sunk at the average

pany's shaft was sunk at the average cost of only \$4.50 a foot, and none of the workings requires timbering. Experts who have examined the propert recently without exception aver that it is the most wonderful mine they have ever seen. Cost of development is about one-fourth that of the ordinary mine.
"The company has its mill installed

with everything excepting the power plant in readiness to commence production. Arrangements are being made to install a gas-producer power plant of 150-horsepower capacity. With its equipment complete the company will mine its ore at a cost of 40 cents at ton, and treatment will cost from 70

cents to 80 cents a ton."

Mr. Rand was accompanied to the district by W. H. Anderson and J. P. Walker, well known capitalists of Minneapolls, Minn., who were likewise highly pleased with the showing, no only in the Gold Chief mine, but in which they also visited.

SOME IMPROVEMENT IN BOSTON METAL MARKET

(Badger Bros.' Private Wire.) Boston, June 21.-The market was Boston, June 21.—The market was characterized by midsummer dullness during the early trading. A firm undertone predominated throughout. Much depends upon the anticipated sales of metal abroad. The domestic market for metal is improving, with sales at 12½ to 12½ by independent mines, while the Metais Selling company is asking 13 cents, with the domestic visible supply wholly in its hands.—Hovey, Kenny & Co.

New York, June 21.—The curb market sold off at the close; Goldfield Consolidated sold by western interests. We look for a rally tomorrow; market very dull.—Hutton.

SILVER KING CON. ORE IS IN LARGER BODY

New developments, decidedly couraging, are reported from the Silver King Consolidated company's Park City mine, but Manager Solon Spiro said last night that he was not pre-pared to report that a strike had been made. "We have been following ore for some time in the lower workings," he explained, "and within the last few days it has widened, with every indi-cation that it might open into an ore body of stoping dimensions. It is in the right formation and in the right place with reference to the contact, apparently, to develop into something interesting

MINING NOTES. W. C. Alexander has returned to the city after two weeks occupied in looking after his mine holdings near Battle Mountain, Nev.

F. Cushing Moore, state mine inspector of Idaho, was in the city yesterday on the way home from Chicago, where he attended the convention of the Mine Inspectors' institute of the

Notice To WATER USERS.

STATE ENGINEER'S OFFICE, SALT
Lake City, Utah, June 14, 1910.

Notice is hereby given that the Progress company, by its manager, Chester P. Cahoon, whose postoffice address is Murray, Utah, has made application in accordance with the requirements of the Compiled Laws of Utah, 1907, as amended by the Session Laws of Utah, 1909, to appropriate ten (10) cubic feet per second of water from Spring creek, Sait Lake county, Utah. Said water will be diverted at a point which lies 341 feet south and 1,254 feet east of the northwest corner of the southwest quarter of section 16, township 2 south, range 1 east, Sait Lake base and meridian. As much of said water as may be necessary will be used during the entire year for domestic purposes. All profests against the granting of state engineer's office as No. 3017.

All profests against the granting of which is application, stating the reasons therefor, must be made by affidavit in duplicate and filed in this office within thirty (30) days after the dompletion of the publication of this natice.
